# THE CRISIS WE'RE FACING

## +100,000

healthy pets are euthanized every year in California — simply because shelters are too full.

## LACK OF ACCESS

Rural neighborhoods are hours away from the nearest spay/neuter clinic.

## WHAT AB 2010 DOES

AB 2010 removes outdated regulations so that high-quality, high-volume spay and neuter clinics can operate more efficiently — without requiring a dedicated surgical suite, while fully maintaining all health and safety standards.

It also facilitates M.A.S.H. Clinics (Mobile Animal Sterilization Hospitals) — traveling units that bring surgeries directly to underserved neighborhoods and rural towns across California.

## WHAT THIS MEANS FOR YOUR COMMUNITY

### MORE SURGERIES, MORE ACCESS

Clinics can serve far more animals than traditional models — saving more lives at lower cost.

### CARE COMES TO YOU

Mobile M.A.S.H. units will set up in community buildings right in your neighborhood — no long drives, shorter waits.

### FEWER PETS ABANDONED, FEWER EUTHANIZED

Affordable sterilization means fewer unwanted litters, less shelter overcrowding, and more happy families.

*"At Animal Balance, we've spent years bringing high-volume spay and neuter services to the communities that need them most. AB 2010 is the legislative breakthrough that will allow us — and organizations like ours — to do that work at a scale California has never seen before. We urge every animal lover, every shelter, and every community leader to stand behind this bill. The animals are counting on us."*

EMMA CLIFFORD, EXECUTIVE DIRECTOR, ANIMAL BALANCE

*"California's pet overpopulation crisis is out of control. For too long, families in rural communities have had nowhere to turn. AB 2010 provides a real solution — and it will save lives."*
